

Bayanat Airports To Launch New Technologies At The Airport Show 2009

Dubai, United Arab Emirates, May 14, 2009: Bayanat Airports Engineering & Supplies, the leading airport systems integration provider, today announced that it is participating in the Airport Show 2009, which is being held at the Dubai Airport Exhibition Center from May 19-21, 2009. The company, together with its global vendor partners, plans to announce the launch of several new technologies, showcase its best-in-class solutions in surveillance, communications and navigation for runways, terminals, air traffic control and management and present its newest service - 'Managed Airport Systems Services' to a focused audience. Technology experts from the company and its partners will be available at the exhibition to demonstrate the features and benefits of their latest technology solutions.

"Airports around the world have been implementing the latest innovative technologies to ensure the safety and security of the country's airspace and passengers. The Airport Show is a much focused event for the aviation industry and a perfect platform for us to launch new products, showcase our latest and best technologies for the aviation sector and meet with customers and partners under a single roof over three days. Bayanat Airports has been participating in the event for the last seven years and the response we have received each year has always been better than the preceding year. We are excited about our participation and look forward to a bigger and even better show this year," says Mr. Georges Hannouche, CEO of Bayanat Airports Engineering & Supplies.

Bayanat Airports specializes in seamlessly integrating various technologies required by airports in environments where quality, safety and security are the key drivers. Over the last ten years, the company has successfully executed a large number of major Airport projects in the UAE and the Middle East Region.

The systems integrator has a wealth of experience in Runway Systems, encompassing all the systems deployed on runways that allow the control, monitoring and reporting of landing, take-off and movement of all traffic related to runways, taxiways and aprons. The company specializes in the design, supply and commissioning of Special Airport Systems (Terminal Systems), that help passengers to move smoothly through the Terminal from

check-in to the departure gate and provides the airport staff with powerful tools that allow the control, monitoring and reporting of all terminal related services and activities. Bayanat Airports also has an in-depth knowledge of ATC systems deployed in airports. In addition, the company provides design consultancy, project management, maintenance and service level agreements and technical support services.

“Over the last few years, Bayanat Airports has gained a reputation of being a leader in specialist aviation technologies in the region. Our participation in the Airport Show this year will help us further strengthen our position and also create awareness of our best-of-breed solutions,” says Mr. Alan Bourjeily, General Manager, Bayanat Airports Engineering & Supplies.

“We plan to exclusively showcase Airport Security Solutions at the exhibition this year along with breakthrough surface, terminal and enroute surveillance solutions from some of our world renowned partners. Senior officials from our global vendor partners will be on our stand to meet with customers and share their global success stories with them. We plan to hold interactive demonstrations of our latest solutions at regular intervals and meet with customers and partners at the event. We also plan to sign on new global vendor partners at the exhibition,” Bourjeily adds.

Bayanat Airports is participating in the Airport Show 2009 along with its leading global vendor partners which include Host Systems, Tailor Made Systems / TMS Photometrics, Sensis Coproration, Ricochet, Time & Frequency Solutions, SEARIDGE Technologies and Northrop Grumman to name a few. Senior Executives from Bayanat Airports and its global partners will be available on their **stand CD 13** to meet with customers and partners.

-Ends-
