

Dubai International Airport to deploy Ricochet's recording system

Borre, Norway - April 22, 2010 - a leading supplier of synchronized communication and surveillance recording within ATC, compliance and public safety sector – strengthens its position in the Middle East ATC recording market by signing a contract with partner Bayanat Airports Engineering & Supply LCC.

Technology leader Ricochet will deliver a redundant system with recording capacity of 184 audio channels. The voice recording system will be installed at Dubai International Airport. As a major aviation hub in the Middle East, Dubai International Airport was the 15th busiest airport in the world by passenger traffic handling 40.9 million passengers in 2009. The airport is operated by the Department of Civil Aviation.

As the leading airport systems integrator since 1999, Bayanat Airports has been helping its customers in the Gulf region with the supply, design, installation and servicing of Air Traffic Control systems, Runway systems and Terminal systems and Managed airport systems services through its world renowned partners.

“Positioned as key international provider of ATC recording solutions – Ricochet continues to win contracts in the Middle East market”, says Ricochet’s President & CEO Jørn Rød-Larsen.

“Our partner Bayanat has done excellent work on this project. We are pleased to see that customers and partners show strong interest in Ricochet’s global recording solution experience”.
